#### **ONE.FEATURE**

- 1. PLU information and shop name can be edited on the scale directly
- 2. Capable to edit PLU and set parameters by PC management software
- 3. Support U disk export and import
- 4. Upload and download data by network
- 5. Can edit 1-999999 PLUs.
- 6. 12000 PLUs data storage capacity .
- clerk report, etc.

#### TWO. TECHNIC INDICATION

MODEL	MDS-6A	MDS-15A	MDS-30A
MODEL			
MAX CAPACITY	6kg	15kg	30kg
MINIMUM CAPACITY	40g	100g	200g
DEVISION	2g	5g	10g
TARE	T=Max		
OVERLOAD ALARM	Max+9e		
ACCURACY			
POWER SUPPLY	AC110V~240V, 50~60Hz, DC8V		
WORK TEMP	0°C~40°C		
WORK HUMIDITY	≤85%RH		
CONSERVATION TEMPERATURE	-20°C~70°C		
PRINT PAPER	LABEL PAPER,RECEIPT PAPER		
MAIN ACCESSORY	LOAD CELL, DISPLAY SCREEN, MAINBOARD		

#### THREE-Symbol Indication FIVE- DISPLAY SCREEN INDICATION

Tare Indication:	
[Weight: 1.000kg ▶Tare]:	di spl ay
[Weiğht: 0.000kg ◀ Zero]:	di spl ay
Indication:	
[Amount: 0.00 ► Stable]:	di spl ay
[Amount: 0.00 ▼ Lock]:	di spl ay
[Amount: 0.00▼ Auto]:	di spl ay

7. 8 000pcs single selling detail and auto-delete the former record if full storage. 8. Various report printout support, including annual report, monthly report, daily report, single item report,

> means scale is in tare status means scale is in zero status Stable

means the value is stable means plu had been lock means the scale is under auto-print mode

#### SIX.KEYBOARD 1.Combine with numerical key to call a corresponding PLU. (Forward) PLU 2.Enter into the interface of PLU set TIME 1.Press this button to show date or time. 2.Move downward. 1.Paper feed. FEED 2. Unprinted buffer data will be cleared in process of feed. 3.Move left. PRICE LOCK 1.Paper feed. 2.Move right. x 1.Enter the item's quantity. 1.Used to change unit price. CHANGE PRICE 2.Used to switch piece input or price input. COMM 1.Test communication status . -0-1.Return to zero. The range is $\pm 2\%$ Max. -т-1.Set the current weight as tare. SET BACK 1.Long press this button to enter into setup interface. 2. To back to the previous interface. 1.Shift the key function. SHIFT 2.Used for switching case sensitivity in text input interface. 3.Long press this button to lock this device. 1.To print. 2.To confirm. AUTO PRINT 1. To switch to auto-sale mode. (Under auto-sale mode, it will print label automatically after calling a PLU.) RE-PRINT 1.To repeat print the last receipt. 1.For emptying data. ESC 2.Cancel or return to the previous operation. 3.Delete DISC(%) 1.Percentage discount.Manual unit price discount or total price discount. 1.Hot keypad, for calling PLU quickly.

#### SEVEN.PAPER SET

#### 7.1.Label Paper

Height ≥5mm,width≤60mm

The value of Spec21 system parameter should be set as "1:Gap paper".

The value of Spec50 system parameter must be set as per the actual size of label paper. For example, the size of actual label paper is 60\*40(width\*height), the value of Spec50 system parameter must be set as 40. (Note: The default value of this model is 40.)

The margin of paper  $\geq 1.5$  mm.

Edit the format of label on PC software, and download the format to the scale by network cable or U-disk.

#### 7.2.Receipt Paper

#### Width <60mm

The value of Spec21 system parameter should be set as "0:Plain paper".

The margin of paper  $\geq 1.5$  mm.

#### 7.3.Change Label Paper

#### Step:

(1)Set the value of Spec0 system parameter(choose a format)

key to enter "Management" interface→ press numeric key **3** to choose "3.Editor"→ press **1** to Procedure:Long press enter "Edit System Parameter" interface→press set value→type 3→press entres to confirm→press to return to the previous interface.

②Set the value of Spec50 system parameter(change height value of paper) key to enter "Management" interface  $\rightarrow$  press numeric key **3** to choose "3.Editor"  $\rightarrow$  press **1** to Procedure:Long press to change Spec number  $\rightarrow$  type 50  $\rightarrow$  press  $\left| \bigoplus_{\text{EVER}} \right|$  to confirm and move on to enter "Edit System Parameter" interface→press

set value  $\rightarrow$  type 40  $\rightarrow$  press  $\bigcirc$  to confirm  $\rightarrow$  press to return to the previous interface.

3Change paper.

7.4.Paper Calibration

If the below problems caused by bad paper calibration, please calibrate the paper sensor as per below operation indication. Complete paper installation -> press and hold down [FEED] key, turn on the scale at the same time -> shows "calibrating" -> shows "Cafinished" $\rightarrow$ release your hand $\rightarrow$ after calibration completed, press **FEED** to adjust the paper's position.

It can not feed a full label or feed a paper with wrong height	1.Didn't

#### EIGHT.COMMUNICATION INSTRUCTION

#### 8.1 Communication Interface Instruction

①Network interface:data uploading and downloading by network cable. ②USB interface:data uploading and downloading by U-disk

#### 8.2 Ethernet Address Set

Operating procedure refer to "TWELVE.SET SYSTEM PARAMETERS" Step:Long press [set] key to enter "Management" interface  $\rightarrow$  press numeric key to choose "3.Editor"  $\rightarrow$  press 1 to enter "Edit System Parameter" interface  $\rightarrow$  press shift key to change Spec number  $\rightarrow$  type 150 $\rightarrow$  press key to confirm and move on to set value  $\rightarrow$  type the value you want to set  $\rightarrow$  press [] to confirm  $\rightarrow$  press [ set to return to the previous interface.

(DView the ethernet IP and ethernet Gateway of computer,

②Set scale's IP according to computer's ethernet address

Spec	Name	Range	Information	Default
150	Load IP-1	0-255	Note: 1.The value of Spec153 must not be the appointed value. When the value of Spec153 is 0,device will connect with network with way of DHCP. Otherwise use appointed IP to connect the network.	192
151	Load IP-2	0-255		168
152	Load IP-3	0-255		8
153	Load IP-4	0-255		133
158	Local Gateway-1	0-255	Spec158~161 is for 4 segment of gateway of network.	192
159	Local Gateway-2	0-255		168
160	Local Gateway-3	0-255		8
161	Local Gateway-4	0-255		1

#### NINE.BASIC OPERATION

#### 9.1 Horizontal Adjustment

Observe the balance to know whether it's level. Bubble level is behind of the pan. Four feet at the bottom of the scale are used to adjust the level. Twirl them to make the bubble on the center of the color circle.

#### 9.2 Zero

When there is no product on the scale but display slight weight, you can press |-0-| to zero. Zero range is  $\pm 2\%$  Max, if the display weight beyond this range, the key will be ineffective.

set the paper properly.Please check the value of the 50th parameter. deviated from U shape paper sensor, please install the paper again. easurement of the U shape paper sensor is not accurate, please calibrate e paper sensor broken, please change a new one. er deviate from the sensor at the paper outlet.Please install paper again. nsor at the paper outlet is not accurate, please calibrate again. nsor at the paper outlet is broken, please change a new one. e paper sensor broken, please change a new one.

#### 9.3 Manual Input a Weight Value

At first, change the value of 77th parameter as "1:enable", then press numeric key to input the weight value  $\rightarrow$  press and hold until the corresponding weight value showed on the weight column.Press -T- to clear the weight value.

#### 9.4 Tare

Put the good's package on the scale and press -T- to return to zero, display screen shows tare indication. Now the weight screen will show the good's net weight when you weighing. Tare range is 0~Max. Tare is ineffective if beyond tare range.

#### 9-5 Digit Tare

E.g:the known tare is 0.600kg

Type 60→press and hold key→show weight -0.600kg,press key again to clear tare value.

#### 9-6 Edit Store Name

SHIFT PG UP	: For switching capital letter and lowercase letter	Space	:blank space key
Back space	ESC :delete or clear	IME	:For switching language

STEP	DISPLAY
1.Press and hold	Management 1.Administrator 2.Clerk 3.Editor 4.Report 5.Exit

	5.take away the label and stick it on commodity2.The label of the commodity3 will be printed out.
	6.Repeat as the above steps.

<sup>(2)</sup>Package by Fixed weight

The PLU should be set as packing by weight, and the weight tolerance should be set on PC software or scale. E.g:Fixed weight:1.500kg,tolerance:5%,hotkey1:longan,the unit price is 20\$/kg

STEP	DISPLAY
1.Press -0- key to let the scale return to zero	Name: No PLU
	WT: 0.000
	U.P: 0.00
	Tot: 0.00
2.Press the hotkey <sup>1</sup>	Name: Longan
	WT: 1.500
3.Put the longans 1.500kg on the pan	U.P: 20.00
	Tot: 30.00
4.A.it will print label automatically if the scale under	er auto-print mode.
B.press [print] key to print label.(not limited by	fixed weight)
Note: It will print label automatically at the cond	ition that its weight is between the weight tolerance $\pm 5\%$ kg while
it is in Fixed Weight package mode, or you have to	press PRINT • to print-out label.

<sup>③</sup>Package by Fixed Price

The PLU should be set as packing by price, and the price tolerance should be set on PC software or scale. E.g:Fixed price:30\$.tolerance:5%, hotkey1:longan, the unit price is 20\$

STEP	DISPLAY
1.Press $\left[ -0 \right]$ key to let the scale return to zero	Name: No PLU
	WT: 0.000
	U.P: 0.00
	Tot: 0.00
2.Press the hotkey <sup>1</sup>	Name: Longan
	WT: 1.500
3.Put the longans 1.500kg on the pan	U.P: 20.00
	Tot: 30.00
4.A.it will print label automatically if the scale under	er auto-print mode.
B.press [print] key to print label.(not limited by	fixed price)
Note: It will print label automatically at the cond it is in Fixed Weight package mode, or you have to	lition that its weight is between the weight tolerance $\pm 5\%$ kg while press PRINT $\bigoplus_{\text{BVIER}}$ to print-out label.

④Piece together sale	
E.g:sale a fruit-dish	
This function is avail	able by setting a hotkey on PC or the scal
Hotkey3:Fruit-dish	(When you edit the PLU of "Fruit-dish",

### FOUTEEN.WARNINGS

- **DON' T** use the product in following conditions:
- 1. Where is in vibration and sway;
- 2. Where the air-conditioner and/or fan is blowing directly; 3. Where is dusty and humid;
- 4. Where is inflammable and explosive.
- This product must be connected to a power socket which is grounded well; otherwise, it may cause personal injuries.
- When connecting the product to external equipment, please make sure that it is powered off; otherwise, it may cause damage to the equipment.
- DON' T plug in or unplug all communication interfaces, such as parallel communication interface, serial communication interface, etc. when it is power-on.
- DON' T plug in or unplug the product when it is power-on.
- The printer used for this product is a thermal printer which is only used with qualified thermal paper. Therefore, please confirm the type of paper for printing is correct before you feed the paper for printing; otherwise, it may cause unrepairable damage to the print head and the printer.

#### **FIFTEEN.CAUTIONS**

- Place the scales on a level table. Adjust four feets to center the bubble on the scale, ensure that the scale can work on a horizontal status to guarantee the accuracy of weighing.
- If the machine has printing error, indicates error, or sounds an alarm and fails to print, it means there is any malfunction in the machine. You have to check whether the printing paper is supplied well, whether the print head is in the place and whether there is any foreign objects on the light sensor. You should clean the dust and foreign objects on the printer, print head and all parts of the scale. Make sure that the print head should be cleaned once a month. The printing paper fed to the printer should be dry and good for well operation.
- DON' T dismantle the electronic scale at a venture. DON' T make the electronic scale fall down or impacted strongly. If you find that a weight placed on the electronic scale exceeds the maximum range, please remove the weight immediately; otherwise, it will cause permanent damage to the electronic scale.
- When the electronic scale is power-off, no weight is allowed to be placed on the scale pan. The electronic scale which is left unused for a long period of time should be well packaged and placed in a certain place. No weight is allowed to be place on it.
- You should check the reason for unstable display of weight value in the course of operation to see whether there is any strong magnetic interference around, such as mobile phone, television, freezer, etc.
- The length of communication line for serial port RS232 of the electronic scale may not exceed 8 meters, while that for network port TCP/IP may not exceed 200 meters.
- DON' T press the keys with sharp fingernails, to prevent outlayer from destroying.

#### SIXTEEN. Tips

According to Instruction for electronic weighing instrument industry made by General Administration of Quality Supervision, Inspection and Quarantine of the People's Republic of China, for any electronic weighing instrument manufactured by our company:

- 1. Any customer and user may not calibrate or adjust it. Any adjustment and calibration must be conducted by measurement institution recognized by or service center for examination and determination authorized by the government;
- 2. The electronic weighing instruments manufactured by our company are sold by professional dealers or companies with sales qualification and entities with sales record recognized by the state. The quality of any other product sold beyond the scope shall be responsible by the sales organizations;
- 3. Any electronic weighing instrument manufactured by our company, if its lead seal is destroyed, shall be re-adjusted, determined and sealed by the institution with verification qualification; otherwise, our company will not be responsible for the quality of products;
- 4. Any electronic weighing instrument which has already been delivered from the factory for half a year and more should be re-examined and re-determined by the inspection institution recognized by the state. It cannot be sold until it is examined and determined to be qualified or returned to the manufacturer for readjustment;
- 5. Any electronic weighing instrument which has already been used for one year should be sent to manufacturer or nearest inspection institutions recognized by the state or qualified inspection and test institutions authorized by the state for examination and determination. It cannot be used until it is qualified; otherwise, any consequence shall be borne by the user;
- 6. The customers are required to do regular calibration of measurement for the electronic weighing instrument manufactured by our company before operation. We suggest to have a standard weight for regular check or to check by making weighing comparison with other normal electronic scales. If any abnormality is found, it should be sent to a qualified calibration and determination service center for handling; otherwise, any consequence arising therefrom should be borne by the user.

Notes for Warranty:

- or destroy by us. We hope all users to be more careful.
- without permission.
- fall in the warranty scope:
  - (1) The product is damaged due to improper operation, maintenance or keeping.
  - product, or the relevant information cannot be confirmed.
  - (3) The certificate of compliance and warranty card are altered much.

  - (5) No purchase voucher and warranty card.
  - (6) Battery and sensor are not in the warranty scope.
  - accidental breakdowns out of our responsibility.
- above requirements.

Warranty Card

> In order to guarantee your rights and interests, any user who buys our products shall properly keep the certificate of compliance, warranty card and purchase invoice, which will not be reissued for loss, alteration

> Under the condition that the correct installation methods and operation rules are followed, we make a commitment that we will provide repair or replacement for free (except the print head) if any trouble (not caused by misuse or vandalism) is caused to the product within one year from the date of sales.

> Without our permit, we shall have the right not to provide repair or replacement, no matter whether the product is damaged or not, if the lead seal or seal is destroyed privately or the case of product is opened

> No matter whether the product is within the warranty period or not, any of following circumstance will not

(2) The relevant information on the certificate of compliance doesn't conform to that on the data plate of

(4) The product is damaged due to user's carrying or moving or falling or crash due to improper placement.

(7) Our repairer determines that it is damaged by natural disasters (such as fire and earthquake) which are

> Any user who purchases our product shall carefully read the aforesaid information and acknowledge the
